Checklist: Use this checklist when considering whether to buy or hire a forklift

Considering whether to lease or purchase a forklift for your business can save or cost you a ton of cash.

When thinking of buying an expensive or costly forklift, you have to consider whether owning it will have greater long-term benefits than simply hiring it from a third-party provider.

In this checklist we consider our options at the benefits of leasing instead of purchasing stockroom gear.

We likewise give suggestions on what questions to ask your forklift provider and some significant inquiries you should cover with your provider before picking either alternative.

Keep this checklist handy on your next visit to your forklift dealer.

CHECKLIST

- □ **Did you research the forklift hire company?**
- □ **Did you ask yourself what type of forklift do you need?**
- □ **What weight and lift necessities do you need from your forklift?**
- □ **Will you need any forklift connections, extensions, attachments or expansions?**
- □ **Will you use your forklift in an indoor or outdoor operating environment?**
- □ **How Long Should My Forklift Rental Be?**
- □ **What Will I Need to Power My Forklift?**
- □ **Should I Get the Forklift Delivered?**
- □ **What Happens if Something Malfunctions During My Rental?**
- □ **What Happens When I am Done with My Rental?**
